SKILLS

- | | |
|----------------------|-----------------------|
| • JavaScript | Beginner/Intermediate |
| • HTML | Intermediate |
| • CSS | Intermediate |
| • REACT | Beginner |
| | |
| • Git / GitHub | |
| • npm / node.js | |
| • Visual Studio Code | |

EXPERIENCE

[AsuraTech](#) | **Front-end | Personal Project:** Created a simple page that conveys my ability to take a design and turn it into a dynamic website using REACT, CSS, and JS. The biggest challenge I faced during this project was learning how REACT works.

[Portfolio](#) | **Front-end | Personal Project:** Designed and built a dynamic website with separate pages for my personal portfolio. This portfolio was made using HTML, CSS, and JS. This project pushed me to be more creative and make it more personal to myself.

[DuckGame](#) | **Front-end | Personal Project:** Implemented JS to build a simple game about clicking a duck that moves for points. This project also used REACT and CSS. This project was simply to get a better feel for javascript.

EDUCATION

Stanhope Elmore High School
Programming with JavaScript | META course
CS50: Introduction to Computer Science
